DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 rejected under 35 U.S.C. 102(b) as being anticipated by Wheeler (5,058,837).

Re - claims 1 and 7: Wheeler discloses a plurality of vortices generating protuberances which generate small-scale vortices. (see Figure 5)

Re - Claims 2-6, 8-10: It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masnam 2 USPQ 2d 1647 (1987). Therefor since Wheeler has disclosed every structural limitation found in the applicant's claims, the claimed invention is anticipated.

3. Claims 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Wheeler. Wheeler discloses a method of accelerating diffusion of a primary tip vortex comprising the step of generating small scale vortices that are at least partially entrained within the primary tip vortex to destabilize a core of said primary tip vortex

(see Figure 1-5). Claims 12-14 are anticipated since it has been held that rearranging parts of an invention involves only routine skill in the art. In re Japikse 86 USPQ 70.
